

## Summary

A Exeter University graduate of 2023 with a degree in Business Management supplemented by diverse tech-focused studies, I bring a unique blend of strategic business acumen and technological savvy to the table. Beyond academia, I excel on the rugby field, embracing teamwork and discipline. Off the field, I thrive on mental challenges, regularly engaging in puzzles for brain stimulation. Passionate about personal development, I continuously seek avenues for growth, currently immersing myself in self-learning programming to pivot towards a tech-oriented career. Complementing this journey, I invest in courses in leadership and property, expanding my skill set and knowledge base. My portfolio reflects not just qualifications, but a commitment to excellence and holistic growth, ready to contribute value to any endeavour.

## Core Competencies

- 
- |            |                     |                   |                   |         |
|------------|---------------------|-------------------|-------------------|---------|
| - Python   | - JavaScript        | - HTML            | - CSS             | - React |
| - Git      | - Communication     | - Problem Solving | - Troubleshooting |         |
| - Teamwork | - Leadership        | - Discipline      | - Adaptability    |         |
